SERVICES

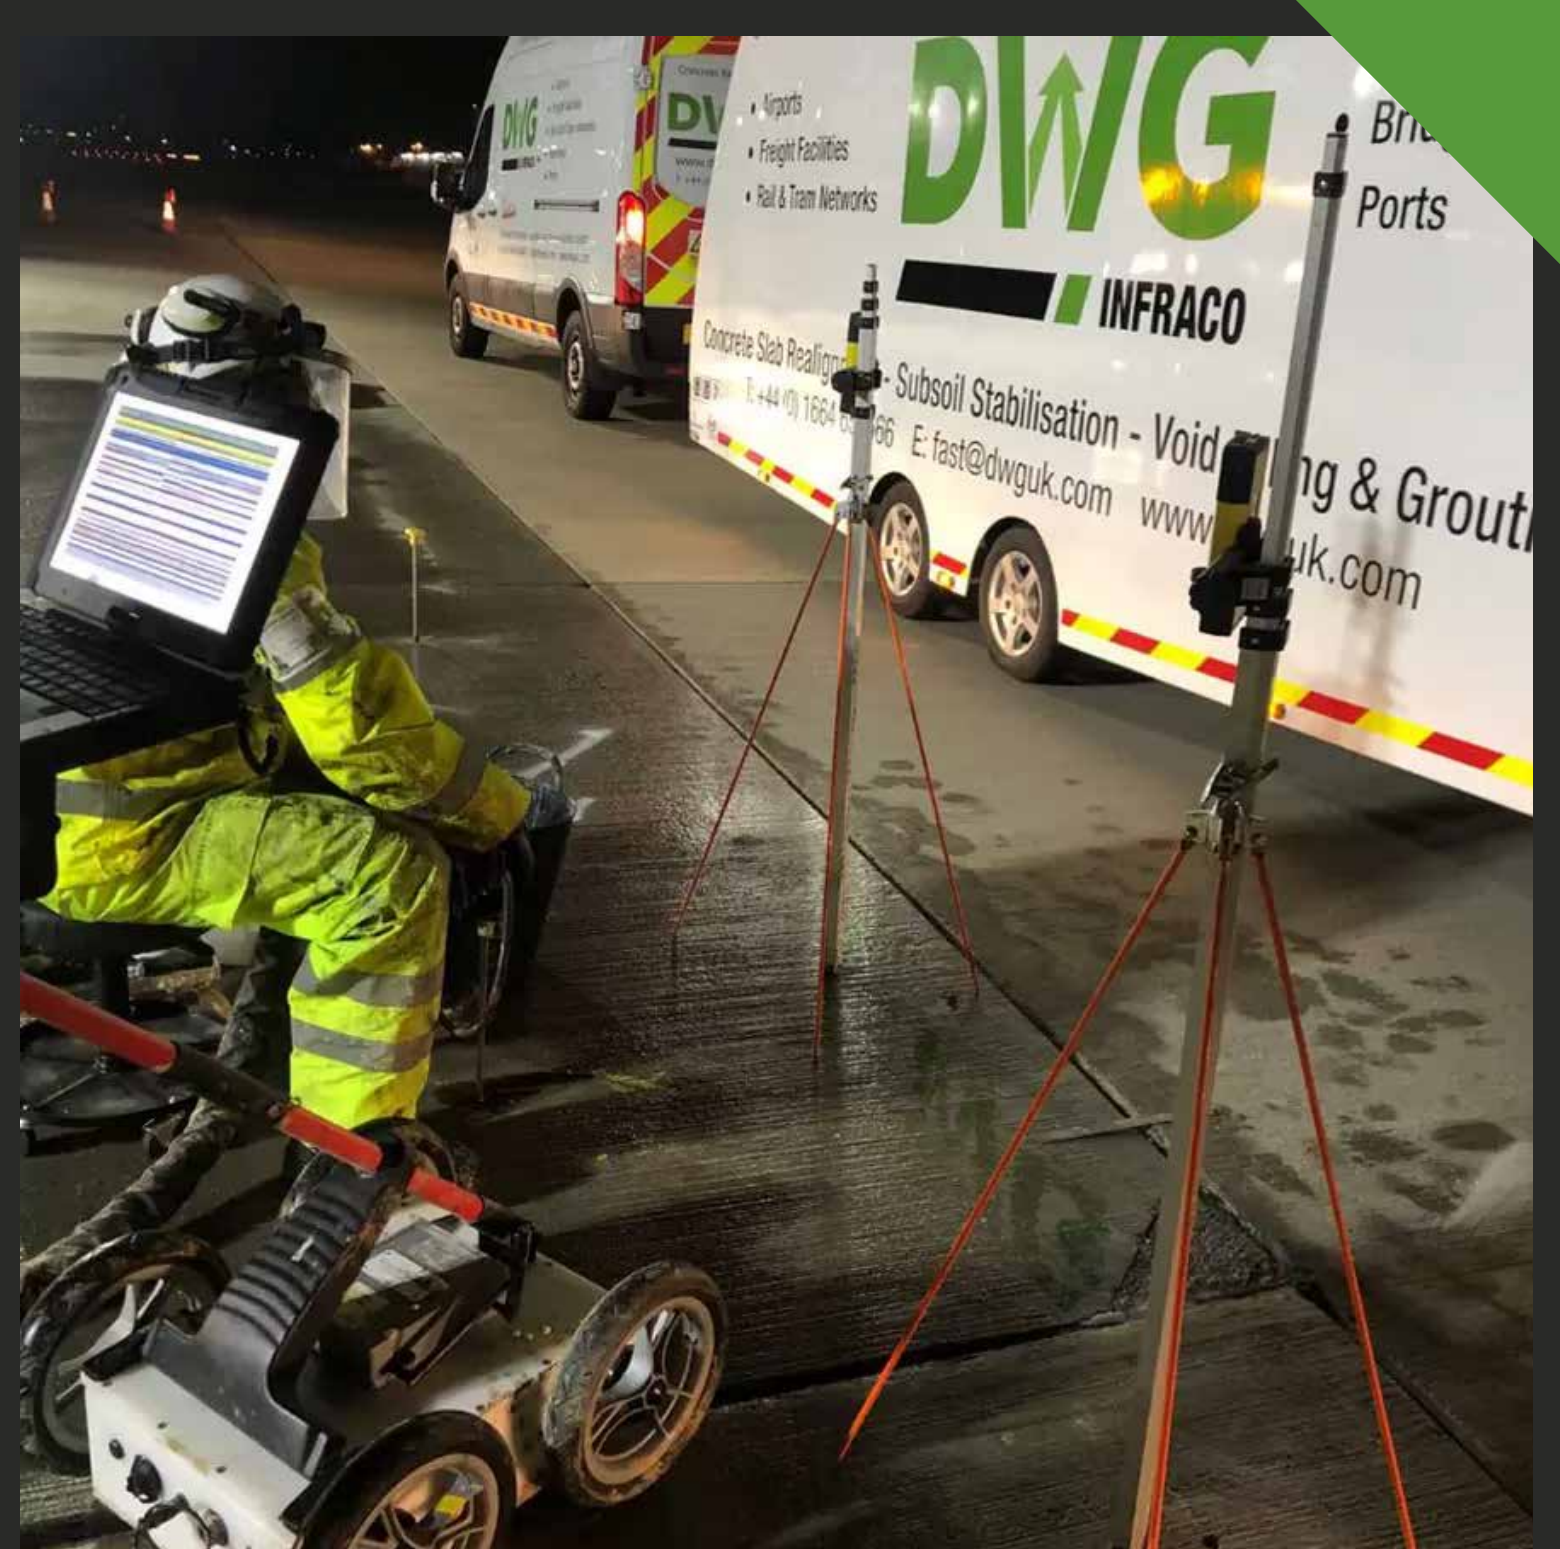

GROUND ENGINEERING

Our proficient ground engineering services can revitalise weakened and damaged grounds. At DWG Infracore, we offer a diverse range of services, including concrete lifting and levelling. Our concrete lifting services are essential for commercial environments where a slab or bay has sunk due to sub-base failure. We provide concrete lifting services to clients across various sectors throughout the UK. The DWG team is dedicated to restoring your concrete and will work diligently to achieve that goal.

LIFE EXTENSION

At DWG Infracore, we offer SpikeFast and FastPatch solutions to quickly restore your timber or concrete. SpikeFast is specially formulated to rejuvenate railway timber sleepers, bearers, longitudinal timbers, wheel timbers, and other railway requirements throughout the UK. On the other hand, FastPatch is an exceptional polyurethane repair system that provides a robust bond to surfaces and maintains flexibility during its entire service life. Our Life extension products are flexible and specifically designed to extend the life of damaged railways.

DRILLING/CORING

No matter the size or scope of the job, we are delighted to offer our specialist concrete drilling services throughout the UK. Our self-sufficient vehicles are fully equipped with all the necessary tools and equipment to ensure a safe and efficient job. Our highly trained personnel possess qualifications such as confined space, PASMA, and boom lift training to handle tasks in any environment. We take pride in using the latest and up-to-date equipment that allows our staff to work quickly and safely.

CONCRETE REPAIRS

We aim to offer sustainable concrete repairs to failing infrastructure across the UK. With the vast number of concrete structures surrounding us and the expectations set by asset owners in our industry, the need for remedial work is continually growing and shows no signs of slowing down. By partnering with us, you can rest assured that we will provide all the necessary products for technically correct concrete repair and protection.
